

AQUILA V4

HYDROMETER

SINGLE-JET METER

APPLICATION

AQUILA V4 is a bulk meter designed to invoice substantial quantities of cold water.

It is characterised by its very high measuring dynamic, insensitivity to disturbance and easy maintenance.

AQUILA V4 is modular and compatible with the IZAR PULSE pulse transmitter and the IZAR RADIO. Its modular rotating flanges make for easy installation on all types of piping, even when resizing is necessary.

Its single-jet technology makes it particularly insensitive to disturbance before or after the meter. It has a CE certificate (MID). It also complies with the EN 14154, OIML R49 and ISO 4054 standards in the horizontal position. However, its performance is largely superior to that required by the regulations, for high and low flow rates alike.

FEATURES

- ▶ Single-jet meter
- ▶ MID approval
- ▶ Glass/metal counter as standard
- ▶ Modular rotating flange
- ▶ Retrofittable with IZAR PULSE INDUCTIVE/HALL (1 pulse = 10 l) and IZAR RADIO COMPACT 868 INDUCTIVE/HALL
